
Butte County Mosquito and Vector Control District

POLICY MANUAL

POLICY TITLE: Abatement Procedures
POLICY NUMBER: 4070

4070.1 Abatement Procedures

4070.1.1 The District strives to work cooperatively with all private landowners/land managers and local, state, and federal agencies. It is the intent of the District to reduce and/or eliminate public health threats and nuisances without the need for formal abatement proceedings. If cooperation and/or an agreement cannot be made between the District and landowner/land manager regarding the known and existing public health threat and/or nuisance, the District Manager may report the vector-breeding land(s) to the Board of Trustees for consideration of proceeding with an abatement order.

4070.1.2 If the Board of Trustees decides to proceed with formal abatement proceedings, the District will conduct the abatement proceeding pursuant and in accordance with California Health and Safety Code, Division 3., Chapter 1., Article 5., Sections 2060 - 2067.
